

## Flight information when and where you need it

### Now flight information displays can go everywhere passengers do

In concession areas, hold rooms, and even airport-managed shuttles or buses, you can bring flight information to passengers any place conventional FIDS systems are too large or too costly.

With microFIDS from ARINC, deploying flight information is simpler and more flexible than ever – creating a better travel experience for passengers and new revenue opportunities for your airport.

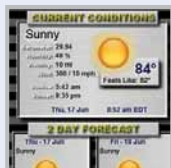

### Innovative flight information systems from trusted experts

Wireless, compact and available in a wide range of screen sizes, microFIDS give passengers the status of their flights virtually anywhere they go in—and around—the airport.

And with ARINC's 80 years of airport operations expertise, including designing, supporting and managing the most sophisticated airport IT systems in the world's leading airports, microFIDS is technology you can count on backed by a company you can trust.

### Quick Facts

- ▶ An easy-to-deploy, low-cost way to expand your existing FIDS network
- ▶ Fully customizable to display arrivals, departures, multiple airports
- ▶ Integrated way finding, weather, news, paid advertising and more
- ▶ On airport shuttle buses, microFIDS is directionally enabled to automatically show FIDS information on the way to the airport for drop-off and customized local area content on return to the rental car center
- ▶ Perfect for airport locations where a full-scale FIDS doesn't make sense
- ▶ 2D bar code scanning—passengers can scan smart phone or boarding pass for instant display of flight information

## Multiple routes to revenue

Affordable to install, ARINC microFIDS systems can rapidly pay for themselves. Using ARINC's iSMART™ technology allows airports to generate revenue in a number of ways:

- ▶ Customize screen content to promote airport services or concessions
- ▶ Sell and display ads for third-party hotels, car rental, attractions and more
- ▶ Keep travelers at concessionaires longer as flights are delayed, increasing sales and passenger comfort

Sunset at: 8:35 pm ..... The forecast for tomorrow - Fri, 18 Jun ..... is "Sunny" with a high temperature of 88° and a low tem

## Quick and easy deployment

Web-based and wireless, getting up and running with microFIDS is as simple as plugging in the power – there's no additional cabling.

A low, all-inclusive subscription-based fee structure makes microFIDS highly cost effective. Hardware can either be purchased or included in the monthly service fee with the software and maintenance.

- ▶ Runs on low-cost, off-the-shelf COTS screens as small as 10.4 inches and up to 52" e-posters – even on an iPad
- ▶ Choose from a range of wall/desk mounted, standalone or mobile vehicle configurations
- ▶ Static or touch screen solutions available

Maintenance is part of your low monthly fee. And with our decades of experience providing technology support for the world's busiest airports, you can count on skilled, responsive and no-nonsense support for your microFIDS systems.
